

Year 5 and 6 Autumn Term

It has been a very busy term for years 5 and 6 so far. In Science we have covered the circularity system in which the children carried out experiments to test their fitness and their lung capacity with some very interesting results.

The children enjoyed our topic of journeys and focused on Spain and Mexico. There was a very interesting and adult debate about bull fighting and whether it should take place. The children produced some excellent work around this topic. The children also looked at different religions and why they go on pilgrimages.

In P.E we have focused on gymnastics and we have some budding gymnasts both boys and girls in the class.

We have had a fun term and hope the next term will be just as enjoyable for the children, they have been a pleasure to teach.

During the next half term we will be focusing on the senses.
